

## HELLO, I'M TOYSINBOX TIMES!

I am an Austin-originated newspaper sold at Toysinbox 3D Printing Store, Toysinbox.com, Toysinbox3DPrinting.com and Toysinbox events at zero dollars. I absolutely adore toys, crafts, books, fun activities, and ENTREPRENEURSHIP!

### ANNOUNCEMENT

By TOYSINBOX PEOPLE

#### Embroidery Pattern: Crystal

The fourth pattern of our 3D Printing Meets Embroidery package was released in late July. See picture 1 to view the design in detail. This pattern is from original artwork created by a Toysinbox associate. The finished pieces are great for wall decor and will surely bring smiles to faces when laid eyes upon. Don't let anyone dull your sparkle! Start building your collection now!

#### Embroidery Pattern: Mountain

The fifth pattern of our 3D Printing Meets Embroidery package was released in late August. It is the most challenging pattern out of the set. However, you can create your own mountains or even clouds! See picture 2 for the design in detail. Just like

the previous ones, this pattern is from original artwork created by a Toysinbox associate. As Meeta Ahluwalia once said, clouds come and go, but the mountain stays. Start making your own inspiring mountains!

#### Free STLs Event 09/03/2021 (Celebrate 5-Pattern-Package Complete)

picture 3

We had never dreamed of releasing a pattern package at the intersection of the 3D printing and embroidery before. Thanks to our Facebook followers' persistent requests and enthusiasm, and the pattern subscribers' generous support, the 5 pattern package was born and is now completed. It opened a new dimension for us to bring 3D printing fun to the public.

We want to celebrate this milestone and share our happiness with you by offering a free pattern sharing event this Friday, September 3, 2021.

This time, the project is super easy in both 3D printing and embroidering. Its size is only 1.5" large. The theme is happiness: serotonin and dopamine molecule structures. Make some for your family members, friends, and coworkers! Spread the happiness! Also, if you're thinking ahead about the coming holidays, you'll definitely need these STLs to 3D print mini meaningful gifts

for the people around, especially those with science minds! Each molecule comes in two forms: a 100% 3D printed version and an embroidery version. Pick two out of four patterns per request. We will announce this on the event day at our Facebook page. Please hold your requests until 09/03/2021.

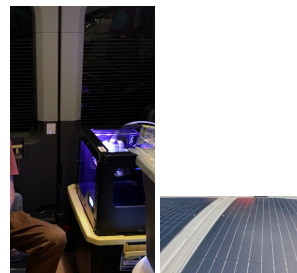

We also offer a 10% discount on the 5-pattern-package purchase which is priced at \$39. Just mention the discount code: CELEBRATE. Your pattern purchase gives you the opportunity to ask us questions related to 3D printing the STL files. Your support will also help us push this line forward. Email info@toysinbox.com for purchase.

#### Mobile 3D Printing

We can't believe summer will be over in three weeks. We surely have been busy this summer, juggling with different fun 3D printing projects. One interesting project we did was about mobile 3D printing with solar energy. No doubt, we made very environmentally friendly 3D prints on a long road trip. Pic 5 and 6 show the 3D printer in action and the roof-top solar panels powering it.
