

HELLO, I'M TOYSINBOX TIMES!

I am an Austin-originated newspaper sold at Toysinbox 3D Printing Store, Toysinbox.com, Toysinbox3DPrinting.com and Toysinbox events at zero dollars. I absolutely adore toys, crafts, books, fun activities, and ENTREPRENEURSHIP!

Teen Program: Fidget Gyro Spinner

Recently, we developed a new virtual program for teens. In this program, students will follow step by step instructions to design a gyro spinner from scratch, then watch their designs get 3D printed live during the session. While the students are watching, we will introduce and explain the 3D printing process.

picture 1

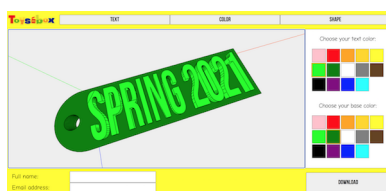

As you can see from picture 1, this spinner has two thick rings, and the inner ring can rotate inside of the outer ring without falling out. It's pretty fun to fiddle around with it, and it's worth mentioning that the metal ring is the size of a quarter. This information may give you an idea of the size of this fidget gyro spinner. Right now, we are accepting the bookings from interested organizations. Email info@toysinbox.com for booking.

Hello Spring!

Spring is here, and we have two things green to celebrate the new season with!

First, we're going to present picture 2, an adorable keychain 3D model with spring vibes. It was generated using our online keychain generator. If you want to learn more about it, check out Toysinbox Times February issue or follow this link:

http://www.toysinbox.com/newspaper/toysinbox_times_February_2021.pdf

picture 2

Our second green thing is from another fun project: 3D printing meets embroidery. It is a work in progress, but you can still see how promising this project is. Weaving thread with 3D prints is a relaxing activity. Follow the pattern, and with one "stitch" at a time, a beautiful plant will begin to show: see picture 3. We will eventually share a simplified model in .stl format with our Facebook followers as they are going to use it in their makerspaces. If you're interested in getting the file, please follow us on Facebook @Toysinbox3DPrinting.

picture 3

Bunnies are always associated with Spring. We brought back this picture of our lovely 3D printing bunnies for your viewing pleasure. Let's hop into spring together! Picture 4 shows the bunnies our students made

in hands-on 3D printing programs we hosted in libraries, schools and our workshops.

picture 4

Grandma reminded us that it still might snow after the first day of spring. We aren't too worried though, because we have some incredibly decorated snowflake cookies ready to meet the smelt snow. See picture 5 and picture 6.
