Sticker Your 3D Prints

Temporary stickers can add extra fun to your 3D printing excitement. We proved it! Recently, we 3D printed a fidget cube and we decorated it with 48 mini stickers. See the pictures below. We think it's a great project for the little ones. If you want to see this cube in action, check out our YouTube channel for the video about it [here](#). The 3D model is from acurazine at thingiverse.com.

Free Halloween & Dalgona Patterns

Halloween is around the corner and the spooky vibe is growing every day. We recently noticed all the dalgona posts on social media, and we wanted to join in on the sugary fun. We were inspired to design a few dalgona patterns and continue our line of 3D printing meets embroidery. We shared these patterns on October 15th with our Facebook followers, and we also want to share them with our newsletter subscribers. You can pick two out of the six patterns. If you are interested, email info@toysinbox.com before Oct 30th to let us know which pattern numbers you'd like. We will send you the STLs and a reference picture. Hurry now! Halloween is almost here.
