#### Play with Google Translate

Do you know what will happen when you put text into Google Translate and translate it into a language then translate it into a different language and back to english? It is not that you always the same result. Sometimes you get hilarious results when you translate text through many different languages. When we found out about it, we tried it ourselves. We used *Let It Go* from *Frozen* and dramatically sang it out loud. This is our result in translating it through Chinese, Macedonian, French, Polish, Haitian Creole, Tamil, Yiddish, Korean, Hindi, Spanish, Nepali, Finnish, and English.

The reason that it gets so distorted is that when you translate from one language to another, some of the information is changed or lost due to grammar, word structures, punctuation, and other rules of speech that vary from language to language.

No one can see traces of,  
Separating the state,

You are here,  
Storm Rage!  
Light snow in the air,  
Growing portion of the gel around my soul,  
I decided to continue to consider the glass

### THE TOY OF THE MONTH (7)

By TOYSINBOX EVENT SELLER J.Y.

#### Hexbug Nano V2

Hexbug Nano V2 is amazing and the bug can climb as tall as you build your structure with Hexbug Nano V2 parts! The Nano bug completely runs on vibration and can flip itself over from its side after a 20 seconds or so. Nano V2 has cool parts to make it more fun. For example, there are parts such as the observatory, the twist tube, and the funnel. The good thing is that you can connect different sets to build a giant Nano V2 set. Can you find the Nano bug in the following pictures? Hint: The bug is green.
