JULY 2019

ZERO DOLLARS

HELLO, I'M TOYSINBOX TIMES!

I am a Greater-Boston based newspaper sold at Toysinbox 3D Printing Store (Wellesley), Toysinbox.com and Toysinbox events at zero dollars. I absolutely adore toys, crafts, books, fun activities, and **ENTREPRENEURSHIP!**

Review: Summer 3D Printing Traveling Program 2019 (July)

By **TOYSINBOX PEOPLE**

We cannot believe half the summer is already gone. Sooooo fast! We were too busy to notice. For our July tour, we hosted multiple 3D printing and 3D modeling programs in NH, MA, TX, GA, SC, IA, IL, MI and RI with libraries, large and small. All were well attended, and people, young and old, were amazed by our programs.

Our traveling program 2019 started with the 1st event kicking off at the Kimball public library (Atkinson, NH) with 2 sessions of 3D printing exploration programs on June 25th. Children and teens all had a great time and all wanted to do more. If you are curious about how the event went, check out the library's facebook page for 66 photos posted about the event. Just search for 3D Printing with Toysinbox. We also shared their post on our facebook page. Once we finished the early bookings in New England, we headed down south to Texas.

The long road trip to Texas started at 4pm on July 4th, so we could arrive on time for the scheduled programs. No surprise that we missed the 4th of July fireworks in town; however, we got to see multiple fireworks from afar when passing by different towns while driving. Sometimes, we saw several fireworks exploding simultaneously all around us. Once we finished the 3D printing events in Texas, we drove to Georgia to host 3D printing programs booked by the local library system and foundation. Right after, we rushed to South Carolina to host a 3D

printing program in a county library. Over the following weekend, we arrived in Iowa for an event scheduled on the coming Monday and Tuesday. We then visited Illinois and Michigan to host multiple 3D printing programs. Then, it was time for us to head back to Boston area to finish a late booking in Rhode Island and Massachusetts.

It is worth mentioning that our traveling team is also willing to help beyond only hosting 3D printing programs. One Toysinbox associate fixed a broken paper printer for a hotel we stayed. Another Toysinbox associate volunteered to troubleshoot Homer Township library's broken Lulzbot mini 3D printer after we finished hosting the 3D printing exploration program. Everyone was so excited when the lulzbot mini got fixed and started to print the iconic Lulzbot octopus.

It is true that our schedule was, and still is, packed, and traveling always feels ever so long. But, that is only one side of story. Our team traveled through 20 states and often passed through scenic routes. We were wowed by the open skies, grand bridges, rolling green hills, wide rivers, smoky mountains, endless crop fields, countless wood fences, rustic red soil and more. Of course, everywhere we went we were sure to try unique local food.
